Crestron Directions

Turn the projector on

- In the upper right-hand corner of the touch panel, press the power button to wake the screen.
- Press “Projector On”

Connect your device

- Be sure your device is powered off before connecting.
- For laptop/tablet devices, connect adapter if needed to either the VGA or HDMI cable located in the black cable box next to the touch panel.

Select your projection source

- Press the button for the source that you would like to use (HDMI, VGA, Blu-ray, Doc Cam, RCA).
- **Note:** You can connect your laptop/other device via HDMI or VGA. Connect the cable fit for your device, then select the appropriate source buttons on the touch panel.
Audio

- If you would like to connect the sound to the system, plug the audio cable into the **headphone** input of your device. If you are connected via the HDMI cable, you do not need to connect this cable.
- You can control the volume by tapping the volume options along the bottom of the screen.

Microphones

- Find the microphone in its charging station or in the drawer. Tap the “Microphone” or “Mic & Audio” button on the touch panel to turn on the microphone and adjust audio levels.
- When finished, return the microphone back to its charging station and press down until it clicks into place.
- **Note**: not all classrooms have microphones.

Please be sure to turn off the system when finished.

- Press the power button on the upper right-hand corner of the touch panel and press the “**Yes, shut down the system and display now**” button.
