Crestron Touch Panel Instructions

Straub Hall

- Touch the power button on the upper right corner to turn the system on.

- Using the appropriate cable from the podium, connect to your device. An adapter will be needed if you are using a Mac/Apple product.

- Touch the “Projector On” button.
• If you want to project only one source, select the source you wish to use on the right side of the screen.

• If you would like to use multiple displays, touch the “Multi Display Mode” button at the bottom of the screen.
• The large boxes represent the projectors/flat screen TVs. Scroll through the projection sources along the top of the screen until you find the source you want. Hold and drag the icon to the box that represents the screen you want to project on.

• Make sure that both the projector and flat screen are turned on. Now you should be able to see your two sources on the projector and flat screen TV.
