

UO Libraries has an agreement with Lane Council of Governments (LCOG) that allows the Libraries to provide UO students, faculty, and staff access to Lane County data for use in teaching and research. This data is available in a shared folder accessible from any UO Libraries computer that requires the user to log in. ArcGIS Desktop 10.X is available on all PC Academic Workstations in the Library and may be used to manipulate the data. (You cannot save your work to the shared drive or the Academic workstation. Save any files needed for later to a USB, your student drive, or other memory device.) Additionally, files may be accessed and copied to a USB drive for use on a non-Library computer. We recommend that you use ArcMap and ArcCatalog to subset and copy the data you need. Library users agree to not use the data for commercial purposes or share the data with outside parties without permission.

This file was last updated in January 2019.

**Directions on how to connect to UO Learning Commons Data Share:**
