

Data Literacy Workshop Series

Data is everywhere and everything has data. With UO Hack and UO Libraries, learn more about data literacy with instruction on data gathering, organization, manipulation, remediation, and advanced transformation and analysis. This 4-session short course from UO Hack and the resources available from UO Libraries will provide a foundation for working with many types of data and tools for working with future data-driven projects.

October 17 - Getting Started with Data

October 24 - Spreadsheets and Formulas

November 7 - Sharing Data

November 14 - Advanced Analysis with Python Pandas
